

Expert Solutions for Skid Steer & Excavator Attachments

Elevating Excellence from Motors to Manifolds

Morrell Mobile is dedicated to the mobile/off-highway industry, with experts ready to support manufacturers of skid steer and excavator attachments by providing solutions and products for engineering, assembling, and testing. Whether you need motors, gearboxes, custom manifolds, valves, couplings, or remotes, Morrell Mobile has the expertise to provide you with the highest quality hydraulic or controls solutions to improve your attachments.

Applications

- Skid Steers
- Excavators
- Wheel Loaders
- Compact Tractors
- Mini Skid Steers

Attachments

- Brooms
- Brush Cutters
- Pallet Forks
- Sweepers
- Snowblowers
- Augers
- Tillers
- Cold Planers

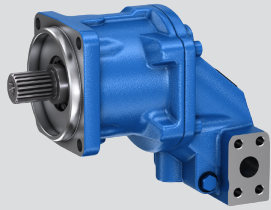

Industries

- Agriculture
- Construction
- Landscaping
- Snow Removal
- Hobby Farms

Services

- Engineering
- Assembling
- MIM
- Testing

Motors

Low-speed, high-torque motors provide compact power to many attachments. These robust and reliable motors offer low noise emissions, versatility, and precision. For high flow, high speed, and high-pressure applications, piston motors provide high efficiency and long life cycles, even in the most harsh environments.

Custom Manifolds & Valves

Experience expert fluid control with custom manifolds and valves that provide control solutions for skid steer and excavator attachments. These valve solutions offer easy configuration, precise function, and high operational efficiency.

Gearboxes

Our gearboxes are designed, developed, and manufactured with advanced technological resources to tailor them to customer-specific requirements. They optimize and ensure the functionality, longevity, and efficiency of skid steers, excavators, and their attachments.

Shaft Couplings

Highly customizable shaft couplings compensate for high rpm and dampen vibrations to reduce the risk of failure, extend machine lifespan, and prevent premature wear on critical components.

Remotes

LOR Mobile Controls provides a full range of radio remote controls, from simple two-function key fobs to 24-channel systems. These ergonomic, impact-resistant remotes provide reliable, interference-free operation.

Wire Harnesses

Wire harnesses are essential for safe and efficient attachment control in skid steers and excavators. These controls provide reliable connectivity, enhanced durability, simplified maintenance, and safer operations.
