A Bosch Company

Tightening Solutions

Tightening systems from Morrell Group and Bosch Rexroth offer smart solutions for companies facing increasing costs, myriad regulations, and client modifications. Their features establish maximum security for your production processes. Morrell Group offers efficient and flexible solutions to your production needs for tightening systems, whether handheld, hand-guided, semi- or fully automatic.

Complete Tightening Solution

Morrell Group offers complete support for your tightening solution from concept to completion. We will help you select the right tools, accessories and configurations to fit your application. Our qualified team functions as an extension of your engineering department, providing startup and integration support, as well as project management.

Extensive R&D Cell

Morrell Group has a research and development cell for tightening technology in our Auburn Hills, Michigan Headquarters. This cell is a comprehensive, hands-on overview of our Rexroth tightening product offerings. The fully-functioning tools on-board include Nexo wireless tools, ErgoSpin tools, variations of Bosch production tools, ergonomic solutions, both control platforms and a working demo showcasing the worker guidance display software.

Electric Tightening Systems

Thanks to Rexroth's patented digital transducer technology, we can provide one of the most accurate, reliable, and robust systems in the industry. Rexroth's commitment to manufacturing standards allows Morrell Group to offer the best-in-class warranty, even at the tool's full load capability. The intelligent corresponding controls systems and operating software make integration and operation a breeze. Control systems are available for single or multi-tool applications, and operating systems are Windows or browser-based for ultimate compatibility.

Handheld Tools

Wireless Tools

Stationary Spindles

Bosch Tools

Morrell Group offers and supports Bosch industrial tools, including battery tools, heavy duty service and air tools and production air tools. Bosch technology ensures reliability and durability for your industrial tightening applications. The tools are designed to be lightweight and robust for everyday use in high production locations.

Production Air Tools

Heavy Duty & Service Air Tools

Battery Tools

Tightening Software

Rexroth offers numerous software options for its spindle tools, handheld tools, and wireless tools. They also offer and maintain a software development platform, IndraLogic, for PLC programming. With this software, programmers can control all of the discrete inputs and outputs in station control and tightening systems.
